

Supported by

With the financial assistance of the NSW Governments Local Sports Grants Program, the Jervis Bay Sailing Club is proud to announce that we have fitted a new Yamaha four stroke outboard motor to our club RIB, which will improve our ability to host sail training programs, deliver power boat operators' courses and major regatta. The RIB can now be utilised to support other like-minded clubs hosting major events by providing reliable on water support.

The club has already provided on water safety support for the recent Callala Bay Primary School sports program for kids along with a power boat operators course and is about to provide on water support to Nowra Community Sailing Club Annual

marathon event and, is about to host 48 boats entered in the Aero Class National Championships.

Without the support of NSW Government Local Sports Grants Program this outboard motor purchase would not have been possible, while ensuring our activates have improved our environmental footprint through reduced exhaust emissions.
